ROADOR REBRAND TO MCLAREN DOORS

A Revolution in Roll-Up Truck Door Design

Aurora, Ontario, Canada— September 5, 2018 — TODAY, RoaDor announced the business rebrand to MCLAREN DOORS. The comprehensive rebrand elevates the focus of the company change in ownership and the increasing focus on digital marketing which includes the new logo, website, social media platforms and brand positioning.

“Since taking over RoaDor in 2013, our team of engineers have been working diligently; reviewing and refining the design to bring it to the level and standards that we operate with at Almac Industrial Systems. Now that we have reached that goal, our brand identity should reflect these achievements.”

Stewart McLaren, President of MCLAREN DOORS and Almac Industrial Systems (Parent Company).

MCLAREN DOORS will continue to manufacture roll-up doors under the new brand and remains committed to the future expansion and development of the product lines it offers.

After purchasing the company in 2013, Stewart McLaren, President of MCLAREN DOORS, changed the direction of the company and began focusing on enhancing the products and services aspect of the business. Having extensive knowledge in the material handling

industry, McLaren was able to visualize key areas within the company that required further development. Working hand in hand with his engineering team, McLaren began making several changes, both small and large. After 5 years of revisions, modifications and testing, McLaren was ready to bring the reinvented company back to the market and has applied his family name to represent the quality and workmanship that his ownership has provided.

About MCLAREN DOORS

MCLAREN DOORS has been committed to advancing the technology of roll-up doors, with a primary focus on the trucking industry. While still a relatively young company by comparison, MCLAREN DOORS has continued to push truck door technology forward to match modern day requirements. The core mandate of MCLAREN DOORS is to reduce the weight of

truck doors, which assists in reducing gas consumption, lowering emissions and most importantly providing a safer, more ergonomically friendly work environment for drivers.

About Almac Industrial Systems (Parent Company)

Almac Industrial Systems (Almac Conveyor Company Ltd.) is a world class developer and manufacturer of material handling and automated systems. Founded in 1969, Almac Industrial Systems originally focused on gravity and belt conveyor systems to help companies optimize production processes and minimize non-productive time. Over the years, Almac has grown its focus to provide companies with a wide variety of operations from formed steel and laser cut components to automated assembly units.

MCLAREN DOORS and Almac Industrial Systems are trademarks in Canada/United States and other countries.
